**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 13 is rejected under 35 U.S.C. 102(e) as being unpatentable by Fukawa (6243412).

Regarding claim 13 Fukawa teaches a communication terminal apparatus for use in a radio communication system, wherein the radio communication system comprises a base station apparatus that transmits a downlink signal containing a tap coefficient obtained in association with an uplink signal, the communication terminal apparatus comprising (abstract, figs.1-16):

a receiver that receives the downlink signal containing the tap coefficient obtained in the base station apparatus in association with the uplink signal (for example, col.6, lines 5-55, fig. 2); and

an equalizer that starts an equalizing operation on received data contained in the downlink signal after obtaining said tap coefficient contained in said downlink signal from said base station apparatus (for example, col. 7, lines 1-39, col. 12, lines 40-67, col.13, lines 1-13).

***Allowable Subject Matter***

3. Claims 6-12 allowed. The following is a statement of reasons for the indication of allowable subject matter: an equalizer that performs equalizing on received data contained in the downlink signal received by the receiver, while updating tap coefficients, according to an adaptive algorithm for updating the tap coefficients using, as an initial value, the tap coefficient received in said downlink signal.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
